Pilot Chairs

Operator Chairs

Passenger Seats

About Us

The company, operating under the name Seat Innovation, serves as an umbrella organization to manage the design, production, marketing, sale, and delivery of Alu Design's pilot- and operator chairs, and Modell-Møbler's passenger seating.

Both brands are recognised by customers and shipyards around the world for providing excellent products and developing seating solutions that deliver quality, innovative design, comfort, structural strength, and durability.

Both companies have a recognised track record of innovation. With origins that date back to the 1950s, Modell-Møbler pioneered injection plastic moulding, a technology that inspired designers around the world, including the Danish designer, Arne Jacobsen, who created the iconic "Egg Chair."

Alu Design's futuristic bridge chairs have been featured in television and film action and sci-fi series, including the Star Trek, Transformers and Marvel Cinematic Universe franchises.

Seat Innovation is a single source supplier of pilot-, operator- and passenger seating solutions for the maritime, offshore and leisure craft industries. Creating the industry's first 'bow to stern' premium seating supplier.

When we develop a new high-tech operator and pilot chair we do it to meet the future – the best chair for any crucial job.

Paramount Pictures, the producers of the blockbusters *Transformers* and *Star Trek* movies, were looking for furniture with breath-taking, futuristic designs to help bring their stories to life. And the MH OCH 300 caught their eye as the perfect Sci-Fi object.

Our very own OP series, featured in the hit Hollywood movie "Hitman's Wife's Bodyguard" starring Salma Hayek, Ryan Reynolds, Samuel L. Jackson, Antonio and Morgan Freeman.

ALU jumped at the opportunity of imprinting the big screen with cutting-edge design. Onboard the super-yacht, amongst the most intense scenes, the OP chair adds composure and class.

You cannot miss the OP series chairs' futuristic play.
